EDUCATION

Bachelor of Engineering in Computer Science May - 2024

Jain College of Engineering and Technology, Hubballi

Pre-University Course (PUC) Mar - 2020

P. C. Jabin Science College, Hubballi

Secondary Education / High School Mar - 2018

Dr. GV Joshi Rotary English Medium High School, Hubballi

TECHNICAL SKILLS

Programming: Java8, Core Java, C++, Object-Oriented Programming Concepts

Web Development: HTML5, CSS3, JavaScript, React.js

Design: Figma

Server-Side Development: Node.js, Express.js, RESTful APIs

Database Management: MongoDB (NoSQL), SQL (MySQL 8)

API Testing: Postman

Tools: VS Code, Git/GitHub

Documentation: Microsoft Word, PowerPoint

EXPERIENCE

Full Stack Web Developer Intern May 2023 – Aug 2023

Varcons Technologies Pvt. Ltd, Bengaluru

- Designed and developed responsive web pages for a Wildlife Conservation site using React.js, HTML, CSS, and JavaScript.
- Translated client specifications into intuitive and visually appealing user interfaces.
- Optimized frontend performance and ensured cross-browser compatibility.

Full Stack Web Development Intern Aug 2023 - Oct 2023

Deshpande Start-ups, Hubballi

- Developed a full-stack e-commerce platform aimed at empowering local artisans by integrating frontend and backend systems.
- Collaborated with a team to design the database schema and ensure seamless user experience across the application.
- Implemented the project using the MERN stack (MongoDB, Express.js, React.js and Node.js).

PROJECTS

Integrated Smart Road Safety System

- Developed an innovative solution integrating real-time weather monitoring and automatic hump detection to improve road safety and prevent accidents.
- Selected for the prestigious 47th KSCST State Level Project Exhibition and received recognition for its potential to enhance driver safety through technological innovation.

Contest-Based Game Application

- Developed a full-stack contest-style game using MongoDB, Express.js, React.js, and Node.js.
- Implemented user registration, login, and real-time score tracking, ensuring secure data handling through JWT authentication.
- Designed the frontend with React.js and styled-components for a clean and responsive user interface.

Website Cloning Projects

- Cloned a responsive food delivery website Knight-Bite, replicating features like menu navigation.
- Built a clone of the bike rental service website Royal Brothers, implementing responsive layouts and dropdown menus.
- Created a clone of Amma’s Pastry website with an intuitive user interface.

Vehicle Service Management System

- Developed a software solution to streamline vehicle service operations.
- Features: Appointment scheduling, inventory tracking, and reporting.
- Used HTML, CSS, JavaScript, MySQL, and PHP.
